**1/27/2019**

Dear Hiring Manager,

Upon graduating from Vanier College with a DEC in Computer Science, I worked as an intern for four months at a software firm, Tecsys Inc. As my role as a Customer Care Representative, my main responsibility included the following:

- Analyze, debug and find solutions for existing bugs and errors within the Tecsys software using Java and SQL as the programming language.
- Attend to the concerns of the client and take the necessary steps to find a solution.

My internship at Tecsys Inc. allowed me to implement my knowledge in Java, SQL and gave me the opportunity to learn how industries and corporations operate in the IT world. In addition to the technical aspect of my role, I learned how to deal with clients and their concerns. My time and experience at Tecsys Inc. have given me a strong understanding of the professional behavior and courtesy that is required.

Over and above my industry experience, I love working within the field of web development and this is where I believe my skills and abilities will be valuable for this position. I have a few web design tasks and projects I have worked on that can be viewed on my GitHub account. I have created a full-stack photography website using the Laravel framework as well as many other technologies such as AJAX and JavaScript. I am personally very proud of this project as I believe it demonstrates my ability to create a unique, innovative and user-friendly applications that delivers, not just a robust working product, but an attractive web design to engage the users.

Aside from my academic background and experience, the one aspect that differentiates myself from other candidates is my love and zeal for programming. I have always been a self-motivated programmer mainly because Computer Science is not solely a career but a passion.

I am confident that my background and knowledge in the field of Computer Science coupled with my zeal and passion will prove a strong asset to your organization and will be a positive contribution. I appreciate your consideration and I hope we can meet to further discuss this opportunity.

**Sincerely,**

**Samee Rehman**
